

31 March 2014

Commissioner
Stella Maris Inquiry
Level 2, Stage 5, Cascom Centre
13-17 Scaturchio Street
Darwin NT 6009

By email: Stellamaris.Inquiry@nt.gov.au

Dear Sir or Madam

In the matter of: THE INQUIRY INTO THE STELLA MARIS SITE.

Notice No: 2014/98-7-66

I refer to the summons for production of records in the above matter addressed to Telstra Corporation ("Telstra"). A copy is enclosed. I respond accordingly.

A Telstra employee has arranged for the collection of network data showing outgoing and incoming call records for telecommunication service 0889826434 for the period on 10 July 2012. The records that were found are attached as Annexure "A".

Yours faithfully,

A handwritten signature in black ink that appears to read "Gerry Griffin".

Gerry Griffin
Security Liaison Officer
Group Risk Management and Compliance (GRMC)
Finance & Strategy | Law Enforcement Liaison

Explanation Notes:

Network call data is obtained from Telstra's various network switches and provides a listing of the components of calls and SMS (Short Message Service, a text message sent via a voice network) made from and/or to a particular telecommunications service; this may include communications switched between a non-Telstra service and a service on Telstra's network.

A Number	The telecommunications service that originated the call
B Number	The telecommunications service that received the call
Date	The date of the call
Time	Local time (24 hour clock) for the party identified at column 'AB'
Duration	The duration of the call in seconds (or 'SMS')
Div	When 'D1' is present this identifies a diverted call
AB	'A' or 'B' in this column identifies which party the record (and the IMEI, CGI and Location) relates to; if no value is present this signifies an 'intermediate' record which does not relate to either party
IMEI*	The International Mobile Equipment Identifier, a unique handset identifier
CGI*	Cell Global Identity, unique world-wide mobile network cell identifier
Location*	The name of the Telstra base station relating to the network cell used to connect the mobile service to Telstra's network

***IMEI, CGI and Location** values are present only in relation to Telstra services, or other carrier/service provider services which are using Telstra's network.

Telecommunications networks may generate multiple records of the same call or SMS within their various switches. This is a normal situation. The multiple records represent different components of the same call, for example a record is created when a call is passed from one telecommunications carrier's network to that of another telecommunications carrier, or where a call is made to an Intelligent Network service (e.g. a 1800 or 13 prefix service) or between switches on the same carriers network. Each record may be the same or may vary by typically about 1 to 2 seconds, representing either timing differences between networks or elapsed time between the different components of the same call or SMS.]

TELSTRA IN CONFIDENCE

Annexure "A"

Search type	AB (Outgoing/Incoming calls)
